JANESVILLE BY AN OUTSIDER,-A COTTOspendent of the Milwaukee Wisconsin,

I spent Thanksgiving day at Janesville, and it will be a long time ere that bright and beautiful day will pass from my remembrance. In the morning I went to Christ Church, which was built bp the exortions of the Rey. Mr. Spaulding, formerly a teacher in Milwaukee, and now Pastor of the Episcopal Church at Whitewater. There are few more energetic or suc cessful ministers of the gospel that Mr. Spaulding, and this church remains as a monument of his industry and fidelity the first fruit of his labors in the good cause. Around this church and the High School, the city of Janesville has increased more than in any other direction, and nearly every house that goes up in that neighbordace in which they are creeted.

Looking down from the park situated between these two buildings, one beholds the city at their feet-its fine hotels, numerous churches, factories and mills, its busy population. Its railroad bridges and depots, and in the distance the Institution for the Blind, pointing with its silent finger to heaven, and proclaiming that "God is Love," who taught this truth to mankind by giving his only son to suffer death upon the cross, thereby exhibiting the wondrous love, both of the Father and the Son to us. We behold also the river bath; the base of the eminence on which it stands, a fair emblem of the water which shall wash away our sins and make us pure even as He is pure.

Descending the hill we passed through the busy streets of the city till we came to tributes of the beings thus personified.

I am sorry to say that Janesville is es-

Accident at the Capitol.

Yesterday afternoon about five o'clock, a portion of the wall of the retunda, constructing in the centre of the new Capitol, fell with a great orash, smashing beneath it the platform and passage ways between the different wings of the Capitol, and piling up an unsightly mass of stone, mortar and splintered lumber on the ground in the interior of the building.

The break began by the crushing of the jamb of an arched doorway on the north side of the rotunda, extending from opposite the entrance to the Supreme Court room, almost to the entrance to the gallery of the Assembly Chamber, and reaching down to the level of the second floor." A crack had been noticed in the wall

about 3 o'clock, and there were some apprehensions of its fall, but the danger was not considered imminent till about twenty minutes before the final catastrophe, when Mr. Botsford of Michigan, Agent for Ivison & Phinny, book publishers, and Mr. Thompson, of the Secretary of State's office, passing between the Last and West wings noticed a dropping of mortan and a wings, noticed a dropping of mortar and a widening crack in the wall on the West side of the entrance to the Supreme Court room. Mr. Thompson immediately gave the alarm to the workmen aloft, and in the

different offices.

The efficient Superintendent of Public Proporty, Mr. N. Sawyer, was on hand and immodiately set about preparing for any omergency. About one hundred ladies were attending a mosting in the basement of the west wing. Their neeting was ad-journed and they were quietly escented out. Summoning all the assistance he could, Mr. Sawyer immediately began creeting barriendes to keep people out of darger, and had barely finished the work

when the wall gave way.

Mr. Sawyer himself had gone up into the Assembly Chamber to call down some workmen there, and was going down stairs, when the wall commenced falling, and it was only by very rapid motion that he oscaped by a few seconds from being

orushed to death.

Mr. Harvey, the Superintendent of the work, who had been watching the wall, and Mr. Devid H. Wright, who were but a few stops behind Mr. Sawpens weto; just leaving the platform leading from the Assembly to the Senate Chamber, when the wall began falling around them and the platform giving way. Thoy sprang back into the archway to the Assembly Chamber and remained there till all was over. Their peril was very great and their escape

from death very narrow.

There were several other narrow escapes, and had it not been for the barrioudes erected, several lives would probably have been lost. It is an occasion for great grat; and caused the Legislature of that State inde to God that no person was injured to "skeduddle."

Rebel Accounts.

[Correspondence of the New York Times.] WASHINGTON, Sunday, Nov. 27 I am indebted to the courtesy of the

From the Whig, Nov. 25. Goorgia is now the most interesting miltary field of the Confederacy. Sherman having discarded caution and boldly adyanced into the interior, we would that without giving information to Yankoes, who are now dependent upon Southern nesses describe the battle as being as des- sources for information as to his moveperate as that of Stone River. The disments, we could tell our readers where he patches state that Thomas fell back to is and how he is faring. It is sufficient to say, however, that there is nothing in the situation to cause even the least hopeful Confederate to fear, that the turn which the campaign has now taken in that quarter will not result most advantageously to

our cause. Instead of applying the torch to certain overed cities in the Empire State of the South, we indulge the confident hope that Sherman will soon have to exhaust both his military skill and unquestioned energy

Just before going to press, we learned that the War Department had received information from Georgia of eminently en-countging character. We refrain from making a more definite statement of the news as it has reached us, but we are warranted in assuring our readers that the official advices from Georgia are as favorable as we could expect.

From the Sentinel, Nov. 25.

The intelligence from Georgia yesterday, was very agreeable, and the hope grows more buoyant that Sherman will suffer severely for his audacity. A portion of his forces is understood to have been very heavily repulsed in an attempt to cross a stream. We forbear to give particulars of names and localities. Let our forces opposed to Sherman adopt sleepless activity for their motto; let them harass him with attacks, and harnss him with alarms; harass him by day, and navass him by night; let them destroy supplies before him; lot them block his roads, and resist his march at every practical point. All this may be done independent of the heavier operations which we shall doubtless be able to direct against him. Break in upon his army and there will soon be a grand hunt, free for everybody, and in which we hope everybody

There is no confirmation of the report of the burning of Milledgeville.

From the Disputch, Nov. 25. We are still without any official information concerning Sherman's movements in Georgia, but we are not entirely withut some authentic advice on the subject. Sherman was, on yesterday, still west of the Oconce River one of the tributaries to the Alatamaha, which runs southwest through the centre of the State of Georgia. Milledgeville is situated on the west bank of this stream. It is believed that the enomy has been to Milledgeville though we are pretty well assured that no official in-formation of this fact has been received at the War Office.

In the only brush we hear of our troops having with the enemy they have been entirely successful. This affair occurred near Jonesboro, where the Central Georgia Railroad, running from Macon to Savanish, crosses the Oconce River. A considerable body of the enemy's cavulry at-tempted to cross to the east bank of the Oconee at this point on Wednesday morn-ing, but were met by our troops and driv-

on back The situation in Georgia is regarded in official circles as decidedly encouraging. There is one fact in the campaign which we think should give much ground for hope—the slow progress made by Sherman. He is now in his fifteenth day from Atlanta, and has as yet marched only about 75 miles, and has not reached one point of strategetic importance. Perhaps

he does not now, as when he started out on his expedition, feel himself positively master of the situation. We shall hear more from him in the next day or two.

From the Enquirer, 24th. "A repetition of the rumors concerning the occupation of Milledgeville by Sherman, occurred yesterday; and as rumor, whether immediately correct or not, was accepted as a matter of course, we may suppose, for the sake of hypothesis, as to the situation in Georgia, that the city has fallen. Of course, there could have been no determined resistance. This supposition gives color to the rumor that a strong force of the enemy has made a demonstration upon Augusta, within twenty miles of which place it is reported they were ention upon Augusta, within twenty miles countered by our troops and that their left was driven back in confusion, and an assault by their right repulsed with some loss. Savannah being the objective point, with the view of raiding upon Augusta, and destroying it. It is believed that the large fleet which has been in preparation in the James river for some time past is intended to co-operate with Sherman."

From the Rickmond Sentinel. Nov. 24. : It is reported that a force of cavalry en torca Milledgeville, on Sunday night, Nov. 20th, and burned the capitol and penitontiary. Milledgeville is a very small town of about twenty-five hundred inhabitants. Its only consequence is derived from its being the seat of government.

From the Richmond Whig. Nov. 21. The War Department last night was without news from any quarter. rumored, however, yesterday, that the Yankees had occupied Milledgeville, Ga.,

From the Richmond Euguleer, Nov. 24. Private dispatches received last evening are somewhat confirmatory of the statement published yesterday, that Macon has not been attacked by the enemy. . We believe route which will be nameless for the present. Augusta was "all right" last night and every moment that passes increases the scentity of that point. The system of delivering letters at places of business and private houses has been already adopted in most of the larger cities of the country and is found thus far a success. It is substantially the English post carrier system. In view of its success elsewhere, Mr. Wells, our efficient postmaster, has determined upon its establish-ment in Milwaukee. For that purpose about one hundred and lifty letter-boxes are to be located in various parts of the city, convenient for mailing letters. This number will give to each ward between fifteen and twenty of these hoxes, to be located in stores or attached to lamp-posts. Stamps will be sold at all the stores where boxes are located. The letter boxes will be visited at regular intervals by the letter carriers each day, The contents of the boxes located in the business districts will be forwarded to the central office three times each day, and those located in other districts either once or twice. This will enable persons in any part of the city to mail their letters generally within one block of their places of residence. Letters coming by mail will also be delivered to the persons addressed, in all cases where their residences are known at the post

To facilitate this, it is the intention of Mr. Wells to cause the several wards to be thoroughly canvassed as circumstances will permit, with a view to obtaining the name of every person in the city in the habit of writing or receiving letters. It is also desirable that all dwellings should be numbered, and that those who receive letters should request their friends abroad to place the street and number on all letters addressed to friends in Milwaukco. It will require some experience to secure the completely successful operation of the new plan, but there can be no doubt of its ultimate utility. It is expected that the business of the post office will be increased by this arrangement, twenty or twenty-five per cent—an increase which will am-ply compensate the department for all extra expenses. No extra charge will be made for mailing letters or for delivering

In order to hasten the adoption of the system in Milwaukee, we are informed by Mr. Wells that he thinks it expedient at least for one quarter after the 1st of January to charge double the old rates for rent of post office drawers and boxes, and to limit the use of drawers or boxes in each case to one family.—Milwaukee News.

THE commissioner of the general land office is in receipt of a lotter from the surveyor general of Washington territory, giving information of the discovery of gold in Charles river, Grey harbor, Washington territory. He says: "I find gold in quantities over the surface of some twenty or thirty acres, that has undoubtedly been washed there from the canal that enters the harbor. I regard it as evident that good placer digging and quartz mines exist in the range of mountains, on streams emptying into the bay from the north. A company are now making arrangements for working the mines."

Completion of the New Catholic Church ---Its Dedication.

The new Catholic Church on the corner of Cherry and Holmes streets, in the Fourth Ward, is now receiving its finishing touches, and is to be dedicated on Sunday next. It is a handsome edifice of the of having to wait two or three hours, in Roman Gothic style of architecture, built the dead of night, at Milton Junction, for of cream colored brick; its dimensions be- in fact, there are very few Janesville passing 56 by 111 feet. The architect is Mr. Chaveneau of Watertown and the contractors for putting up and completing the building, Mesers. Pattison and Peters of

this city. The finish of the church, both outside and in, is in good taste, and is very neat arched recess, lighted by a stained glass circular window, the ceiling overhead being a blue ground work set with silver stars, and the side walls are tastefully frescoed, as indeed are the walls and ceiling of the entire church. This work was done by Fritz & Co. of Chicago, and refleets much credit on their good taste and škill.

On either side of the altar is a vestry room, and in the front wall of each in the audience room is a niche, one of them to be decorated with a picture of the Blessed Virgin, and the other of St. Joseph. The floor, of the alter is covered with fine Brus. sels carpeting and the railing in front is of highly finished black walnut.

Fourteen windows of stained glass, exclusive of two circular ones, let in the softened light to the edifice, each window having some appropriate device upon it. The first two on either hand from the altar represent the four Evangelists, the next one on the right has on it the letters I. H. S., the fourth the representation of the Lamb, and the fifth the Chalice. On the other side is represented the virgin Mary, the Host and the Dove, while two in front have representations of the Keys of the church and the cross.

The main audience room has accomedations for seating 800 people, and on an emergency a much greater number can be recommodated, as the aisles, three in number, are very broad and spacious.

The gallery has in it a handsome new organ from the establishment of House & Co., Buffalo, besides seating room for a goodly number in addition to the cheir The black walnut finish of the balustrade in the gallery, like that around the altar, is an admirable piece of workmanship. In the basement is a finished room forty feet square for Sunday and day school purposes, besides a furnace room with two of Seavey's large furnaces in it for warming the building.

On the outside the structure has an imposing and pleasing look, the spire rising 132 feet from the water table.

It is in all respects a church of which those who have contributed to build it may well feel proud. Its cost, we understand, was not far from \$20,000.

It is to be dedicated next Sunday, Bishop Henni of Milwaukee, officiating at the dedicatory services. Rev. Geo. Riorden of Kenesha, a man of marked ability and unusual oratorical powers, is to preach the sermon on the occasion.

JANESVILLE BY AN OUTSIDER .-- A COFFEspendent of the Milwaukee Wisconsin, writes a letter to that paper from which we extract what follows:

I spent Thanksgiving day at Janesville, and it will be a long time ere that bright and beautiful day will pass from my re-membrance. In the morning I went to Christ Church, which was built bp the exortions of the Rev. Mr. Spaulding, formerly a teacher in Milwaukee, and now Pastor of the Episcopal Church at Whitowater. There are few more energetic or suc-

cessful ministers of the gospel that Mr. Spaulding, and this church remains as a monument of his industry and fidelity the first fruit of his labors in the good cause. Around this church and the High School, the city of Janesville has increased more than in any other direction, and nearly every house that goes up in that neighbor-hood is a credit to the place, and a token that good schools and churches earlich the place in which they are erocted.

Locking down from the park situated

between these two buildings, one beholds the city at their feet—its fine botels, numerous churches, factories and mills, its busy population. Its railroad bridges and depots, and in the distance the Institution for the Blind, pointing with its silent fin ger to heaven, and proclaiming that "God is Love," who taught this truth to mankind by giving his only son to suffer death upon the cross, thereby exhibiting the wondrous love, both of the Father and the Son to us. We behold also the river bath; the base of the eminence on which it stands, a fair emblem of the water which shall wash away, our sins and make us

pure even as He is pure.
Descending the hill we passed through the busy streets of the city till we came to the new Roman Catholic Church, probably the largest and first place of worship in the county, although it has been slightly curtailed of its just proportions, because a safe title could not be given to twelve feet of land on which the chancel should have been built, but it is still a fine structure, although marred by a flat ceiling, which is an abomination to a Gothie edifice, giving tion of the State between the ages of 16 it the appearance of a man without any crown to his head. I noticed too, that the portraits of the Holy Family, in the handsome stained glass window over the altar, had the same defect. The organs of veneration and benevolence having been entirely lest out, thus destroying the choicest attributes of the beings thus personified.

JANESVILLE, CHICAGO AND MILWAUKEE. I am sorry to say that Janesville is essentially an Illinois city. Its railroads lead to Chicago; its papers come from Chicago; its merchants and ladies deal in Chicago; and a great portion of its produce goes to the same place. Indeed, so little is its connection with Milwaukee valued, that the people make no complaint engers to wait there

Coming in constant contact with old complaints, Dr. Price has become thoroughly acquainted with their peculiarties and treatment needed to remove them. But few physicians have had the opportunities for investigating this class of diseases that Dr. Price has had. The practical and pleasing to the eye. Diseases of the head, heart, nerves, liver, kidney, lungs, throat, stomach and blood in a chronic form he treats with a certainty of recovery if presented in a curable stage. FROM THE SOUTH. New York, Dec. 1.—The Richmond Examiner says of Sherman's movements, if he could take Macon or Augusta by the way, he would accomplish great things, but the destruction of those towns was not his main object. His design was to destroy the railroad as far as he could, which runs from Southern and Western Georgia and the Carolinas, and to rest his army at Beaufort and Port Royal. If he can es-

tablish himself permanently at Beaufort,

he may be able to operate against these

roads repeatedly. Furthermore, Beaufort

lies between Charleston and Savannah and

can be conveniently used as the base of land operations against either. Washington, Dec. 1.—Nothing had been neard from Sherman. The general belief in Savannah that he was advancing en

in savannan that he was advancing en-that city in two columns caused great con-sternation among the rebel authorities. New York, Dec. 2.—The New York World has the following extracts from Richmond papers of the 20th: The telegraph to the Richmond Sentinel says: We again repeat, as the enemy have no means of communication with Sherman, that it is deemed best for public interest not to publish intelligence of military movements

in Georgia.

The Dispatch says: Georgia exchanges furnish us very little intelligence. Gov.

Brown has issued a proclamation for a levy on masse of the whole white popula and 55, for forty days' service.

The fright in Milledgeville when the enemy approached was very great. Some members of the Legislature paid as high as \$1,000 to be carried eight miles.

A letter was received in Columbus on

Saturday, Nov. 19th, from Palmetto Point, on the West Point & Lagrange Railroad, stating that Kilpatrick with 5,000 Yankees was advancing down the country, on the Alabama side of the Chattaboochee, burning and destroying everything.
The movement of Hood has had the

exact effect that Davis designed it to have If Sherman reaches the ocean he will burn the whole country from the ocean to the Vestern boundary of Alabama clear. The letter further says the march of Sherman has not been productive of any

results whatever. Macon has not beer captured nor Augusta threatened. Lost week he has not been able to advance ter miles. Repulsed and driven back he has attempted to advance. His army is now harrassed in its flank and rear, and manfully resisted in front. The sen is still more than one hundred miles from his army. Every hour consumes his provisions and concentrates our army. Until his movements developed his intention it was impossible to concentrate our forces without exposing important places; but now that his destination is known, the reasons that have held our forces apart no longer forbid immediate concentration.
We expect to hear of important results

being accomplished before long, but it is of great importance that the enemy should not know at what point Sherman may get through to the sea coast and embark for Grant's army. As for doing the Confederacy any serious injury there is no danger whatever. Neither Macon, Augusta, West Point nor Columbus -all of which are as near vital points as any in Georgia, have been attacked by Sherman. He is seek-ing to get out of Georgia, not to capture any more of her cities. The rumor that the Central Railroad had been cut was not true. It sustained no injury from Sherman's successful march coastward. Our cause cannot escape a great moral defeat by this triumphant raid through the heart of the Confederacy.

NASHVILLE, Dec. 1.—The Federal forces under Gen. Thomas retired from Franklin last night and have taken up a position for line of battle, about two miles south of Nashville. Skirmishing has been going on all day about five miles south of here. Heavy cannonading can be distinctly, heard in the city. No want of confidence is felt by the citizens for the ultimate suc-

FIELD OF BATTTE, Wednesday night, Nov. 30 .- Our forces in position around Franklin were attacked by the rebels in force, early this morning, and fighting continued throughout the day with greater or less severity, resulting in the repulse of the rebels with their loss estimated at from four to five thousand men in killed, wounded and captured.

In the principal assault made upon our lines the enemy showed much bravery. Our victory was complete and the slaugh ter of the rebels terrible.

The 27th corps, General Cox, and the 4th corps, General E. D. Stanley, boro the brunt of the battle and exhibited great velor. General Schofield fought the battle on

the plan which had been well digested be-forehand between General Thomas and himself. The enemy commenced to press upon our roops about 2 o'clock, p. m. We slowly

Cheatham's division, Stewart's corps, threw themselves upon our center with great impetuosity. So vigorous and determined was the assault upon this portion of our lines, that Gen Wagner's division of the fourth, Stanley, e corps, after fighting a long time with desperate valor, was partially broken and gave way, but it is not the custom of the 4th corps troops to remain broken, even though they may be for a time over-whelmed by numbers. They soon rallied to the charge and driving the now some-what disordered enemy before them, resumed their original position successfully, The enemy charged upon this portion of the line, but it neither faltered nor waver-

them sufficient power to enable them to break our right wing. FROM WASHINGTON.

Ir is a noticeable fact that wherever there was any considerable military force, the vote for McCléllan was unexpectedly large. - Janesville Gazette.

Four years ago Lincoln was voted down in Delaware four to one; in Missouri nearlyten to one; in Kentucky more than a hundred to one; in Maryland about forty to one, and in Tennessee unanimously. Now Lincoln carries Missouri, Maryland and Tennessee, and the majorities against him in the two other states are comparatively small. Will the Gazette please to inform us why these startling revolutions in popular sontiment happen to be confined to states occupied by Federal forces?-Milwaukee News. . .

"These startling revolutions" are not confined to state's occupied by military forces. Take our neighboring state of Illinois for example. Mr. Lincoln carries the State by 30,777 majority, which is a Union gain on the copperhead majority of two years ago of 47,443! In the present Congress, the cops. have nine members, and the Union men have five. The next Congross will stand Union eleven : copporhenda three!! Three hundred rebels under Tom Polk Edwards, on the day above mentioned, came across Ashworth's party, and took them all prisoners, including Col. Ashworth himself.

A man named Markham, who was an eye witness of subsequent events, says the prisoners, after their surrender, were marched into a patch of woods hard by, when just one hundred out of the hundred and twenty-five were selected, declared to be deserters from the Confederate army and sentenced, part of them to be shot and part of them to be hung. Preparations were immediately made to carry the threat into execution, and two hours later the hundred poor fellows were launched into eternity, ninoteen of whom were hung. The twenty-five that escaped death were released, after being compelled to witness the death of their companions, upon the promise that they would join the rebel arny. Col. Ashworth was taken away. A SUPERIOR REMEDY.

We can consciontionaly recommend to those suffer ng from a distressing cough, Dr. Strickland's Mellifinous Cough Balsam. It gives relief almost instantaneons, and is withal not disagreeable to the taste. There is no doubt but the Mellifluous Cough Balsam is one of the best preparations now in use, and is all that its proprietor claims for it. We have tried it during the past week, and found relief from a most distressing cough. It is prepared by Dr. Strickland, No. East Fourth street, Cincinnati, O., and for sale by Druggists at 65 cents per bottle.

Another objection to this method of blowing was, that both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years, instruments constructed on this European plan of "double blowers," have been manufactured in this country, and to counteract this difficulty (want of a swell) a lever has been projected from the centre of the instrument, to act upon the swell, and opposite of the instrument, to act upon the swell, and opposite of the first while. large. Janesville Gazette.
Four years ago Lincoin was voted down in Delaware four to one; in Missouri nearly ten to one; in Kentucky more than a hundred to one; in Maryland about forty to one, and in Tennessee unanimously Now Lincoln carries Missouri, Maryland and Tennessee, and the majorities against him in the two other states are compara-tively small. Will the Gazette please to inform us why these startling revolutions in popular sontiment happen to be confined to states occupied by Federal forces?— Milwoukee News . :

"These startling revolutions" are not confined to states occupied by military forces. Take our neighboring state of Illinois for example. Mr. Lincoln carries the State by 30,777 majority, which is a Union gain on the copperhead majority of two years ago of 47,443! In the present Congress, the cops. have nine members, and the Union men have five. The next Congress will stand Union eleven: copporheads three!! This "startling revolution" was offected not only without any military interference, but without the nid of the 60, or 80,000 good Union Illinois men that were fighting for liberty at the front, and had been disfranchised by the action of a copperliend legislature. The Louisville rebel lines, ought to be good authority with the News, and that paper asserts that there was no military interference at the which convey at least an idea of warmth, polls whatever in Kontucky, and it was and, in the neat, half-fitting paletet-shape, one of the three states that disgraced itself by easting its electoral vote for the smallest pattern of a man that was over thrust upon the attention of the American: people by British gold and secesh influence. There was also something of a revolu-

tion in public sentiment in Indiana and Ohio, not induced by federal bayonets. that cannot have escaped the attention of the News. The election of Morton by over 20,000 majority in a state that is usually democratic, and the suppression of a baker's dozen of Ohio copperhead congressmen, cannot be accounted for upon the News' theory of military interference.

All the moral forces in the universe are at work against the principles that the News seeks to promulgate, but it is too a popular uprising for the destruction and overthrow of some gray old abuse, our/contemporary mutters something about the Constitution, and sneers at the higher law.

One thing, however, the Newshaza right to pride itself upon. It is published in the strongest copperhead hole in America. All the morit there is in that fact we freely accord to it. Let it congratulate itself that Mr. McClellan has still left him Kentucky, Milwankee, and the Camden and Amboy Railroad.

Augusta, the capital of Richmond county, is one of the handsomest cities in the South, and ranks above Macon and next to Savannah, in Georgia. It is situated on the Savannah river, two hundred and thirty-one miles from its mouth. The Georgia Railroad, of which Augusta is the eastern terminus, extends to Atlanta, and the South Carolina Railroad connects it with Charleston. The place also contains fifteen or sixteen churches, two or three academies, a hospital, arsenal, &c. There are some magnificent powder mills at Augusta, put up during the war, from which much of the supplies of the fulminaling material for the South are obtained.

ator, in his Thanksgiving sermon said: It is an Anglo Saxon tendency to observe order and to respect the national authority, and the danger of a despotism arises from this source, not from a revolution springing out of the rlot, but, from that which comes pleading precedent and legal authority. It is this which makes us look so scrupulously after our institutions, and if we look at them rightly to find in. them not only the power of popular :freedom but of good government, and we are now trying this question whether our in-stitutions are a chaos of orderly force, whether there is power in each part to dissolve the whole, or an organic authority that though allowing to each part full life and full liberty, yet in itself preserves

Rev. E. H. Chapin, the great pulpit or-

the sovereignty, whether this orderly sys-tom can be broken up by some selfish claim of each part. We are proud of this democracy of ours as a free government; and it has proved itself so by that most glorious victory of all, the victory of their ballots noiselessly vindicating the sover-eignty of the people, (I am not referring now to the result of that election, but to the orderly delivery of that verdict), and . If any man should say that quiet was ow-ing to the glitter of arms in the distance, I answer, that demonstration, was not to overawe the expression of any man's opinion, but to protect it. To-day we are standing under the shadow of war because of our attachments to freedom, and because we regard freedom not as mere sontiment, but as a living principle, and because we believe that the only way to: preserve it to ourselves and the world, is to give it an organization and endow it with the power of a strong nation and a strong government. Do any say you are forcing others, we reply, we are forcing no man, we are simply calling on men to desist from breaking up the frame work that preserves liberty both for ourselves and the world. If they will desist none will receive them more gladly than we, and they may even come and sit down with our soldiers to the fanst provided for them to-day, but it must be under the old flag. Stock.

Taking the census of 1850 as the basis of the calculation, and there are at this time about six hundred thousand dollars worth of live stock in the United States. Their value exceeds that of all the manufacturing establishments in the country. and also exceeds the capital employed in commerce (provious to the outbrenk of this war), both inland and foreign. Live stock is an immense national interest, but one that has been sadly overlooked by American statesmen and writers on public economy. How to winter cattle, horses, sheep, hogs and poultry in the most economical way, all things considered, is a subject on /which an instructive volume might be written

In the first place, we should rever keep more stock on our farms than we have the into two or more long, slender lappels or means of keeping well. One animal prop-(more properly) sash-ends. We ware la- orly cared for and liberally tended, is worth

stables and sheds are better understood now than formerly, although the practice still lingers on some farms where the shiv ering and bellowing animals speak for themselves, as to its effects. The old plan of stacking hay about the farm, and feed-ing it to animals in winter, with only a ail fence for slielter, is sometimes seen at the present day. If the ghosts of animals which have died for the want of shelter, could haunt the imaginations of those careless farmers, it might perhaps cause a charge in their management. Stacking out hay and fodder causes waste enough in a few years to pay for building good barns, stables and sheds for hay and animals. Leibig asserts that "our clothing is merely an equivalent for a certain amount of food." In other words if we keep ourselves comfortable and warm, we cannot eat so much, because the amount of

heat to be supplied by the food is diminished. ficient mercy upon their dumb beasts to provide them shelter in winter, 'their interests at least should prompt them to do so. An industrious and humane man will

roughest kind. In wintering logs, true economy requires that one should keep no more than will give the maximum of flesh for the food consumed. To keep a pig without his gaining in weight involves not only the less of the food he consumes, but all the injury resulting from the stunting of his growth. Few are aware of the damage done to young animals by prematurely arresting the growth of their bones and muscles. A stunted calf, colt. pig or lamb has received an irreparable injury. You can no more fully make amends for the shock given to the vital functions, than you can give a horse a new seeing eye in place of one that has been put out by violence. No after feeding of a horse

A few superior animals, well housed in winter, and well fed at all imes, yield the largest profit. Of course, slables should be properly ventilated, that all animals may have a full supply of pure air: Most stables, and all sheds, give too much of it, especially in cold weather. Look out for an abundance of straw, or other litter, to absorb all urine, unless you have a tank or other reservoir for it to run into. Manure is as valuable as money at seven per cent. compound interest, for all the crops that manureaids so much in their animal growth, sell at high prices. It costs nearly as much to plow, plant, hoe and harvest an acre of corn to obtain twentyfive bushels as fifty bushels; and manure will double the crop.-American Stock

Journal Philadelphia Press mentions "a rumor in political quarters that, after having felt die pulse of slavery upon the day of election. Democratic leaders are satisfied that nothing can now be done for it except to place it forever out of the way. The new programme of the Democracy will, there fore, be to propose the abolition of slav-ery, thus anticipating the party of the wish of the people. This would certainly be a very sensible movement, and the rumor is by no means improbable. Some of the Democratic leaders were in favor of this course last spring; and quite decided auti-slavery articles were published in the Boston Post, New York Forld, and other leading Demogratic presses. But the malign ilifluences of the Southern sympathizers and Copperheads were too strong, and should not complain when accused of gross | choked these liberal expressions. "The Democracy can now exhibet a late repentance,

We can conscientiously recommend to those suffer ing from a distressing cough, Dr. Strickland's Melliflu ous Cough Balsam. It gives relief almost instanta-noous, and is withal not disagreeable to the taste. There is no doubt but the Mellifluous Cough Balsan is one of the best preparations now in use, and is all that its proprietor claims for it. We have tried it du ing the past week, and found relief from a most die tressing cough. It is prepared by Dr. Strickland, No. East Fourth stroot, Cincinnati, O., and for sale by Druggists at 65 casts per bottle.

New York Fashtons for December.

From the New York Mercury.] The cloaks of the season are more remarkable for comfort than elegance; the enormous cost having cut off the demand for the rich velvets, trimmed with real lace, which formerly constituted quite a large a copperhead legislature. The Louisville proportion of the fashionable garments. Journal, whose copperhead editor, has just Such, of course, are still to be had by those been sent South to his friends within the who are willing to dispose in this way of the requisite number of greenbacks; but the majority content themselves with the fine plushes and handsome beaver cloths.

> are not at all unbecoming. Fur cloaks are not made, excepting to or-der, and they are not likely to be worn to any extent. There is little change in the shape of furs, excepting in culls, which are made smaller, to suit the small sleeves made both for drosses and clinks, Collar ettes are quite as large, and generally round, although a few are made with a point at the back. They seem to have quite taken the place of the victorines, and also of the half-cape, which is only adher-

ed to by those who regard their comfort more than fashion. Coat-sleeves, long basques, and wide weist bands, are the features of the winter dresses, the waistband being generally worn over the basques, which are divided dies egainst more than two, however, as they make the back look broad, and are extremely awkward and ungainly. stupid to see it. When the enlightenment front is plain, to accommodate the waistof the people and the grace of God lead to band and buckle, which is a revival of the fashion of thirty years ago: A belt and buckle of this description, of the plainest kind, cost from \$3 to \$5, so that a set to

wear with every dress becomes quite an

Plain high-cofored silks seem to be more

in favor for party dresses this season than thin materials, probably for economical reasons. When muslins and tarlatans were cheap, a pretty evening dress could be very easily and inexpensively arranged; but now they cost as much as silk, taking into consideration the larger quantity of material necessary to make them full and elegant, and are more frail and infinitely less available. The dark-crimson ribbed silks are very handsome, and trim very effectively with

Tartan plaids and other heavy materials are in great demand for street and house dresses, because they do not require to be lined throughout-a heavy item of expense chine shops, &c., are kept in successful op- now-a-days, when linings cost more than very nice dress patterns did formerly. The bright colors of the plaids, too, which are so repulsive in summer, grow attractive as the cold season advances, and lend a cheerful warmth and coloring to the bleak, cheerless atmosphere. There are only a few persons, however, who can

Women of medium size and light or neutral complexion should confine them-selves to skirts of tartan, wearing with

them a jacket of black cloth or velvet, a

wear to advantage a dress made entirely

of bright high-colored plaid, and these are

full white under waist, and black belt with broad gilt buckle. The English winesy (or linsey-woolsey, us it is usually called) is the best and most durable material for walking dresses. There are two kinds of linsey-woolsey, however; one quite new this senson, and made by the French, of French merino-wool and silk-this is often called poplin: the other is manufactured by the English of a mixture of thread and weel, and is less elegant in appearance, though —we should imagine—much more serviceable. This class of serges and winseys, which bring in England one and sixpence to two shillings a yard, sell here for a dollar and a ball to two dollars a yard

and are only to be obtained at a few leading houses. The new winter-nets in which the "waterfall" is inclosed are very pretty. They are, of course, small; and the "invisible" foundation is covered with small coral, gold, crystal heads. Large mother ofpearl shells, and marine plants made of velvet, are made to ornament these elegant

A great variety of lace head dresses are worn, some terminating in long lappets and burbe-like ends, which cross at the back and descend low upon the shoulder; others forming simply a square of guipure, which is ornamented with coral, velvet and mother-of-pearl or diamond ornaments in front, and loops and long ends of black velvet at the back. ared Union Men Butchered in Georgia. .The bloodiest tragedy of modern times was enacted on Thursday last in Northern Georgia, at a small place called Elijah, fixty miles northeast of Dalton. A short time after the occupation of Northern Georgin by our forces last Spring, 125 men leserters from the rebel army and others, formed themselves into a company to be known as the Walker County Homeltz ards, and selected a brave fellow named Ash-worth, as their leader. Upon many occacasions have these hardy men done the cause some sorvice. Three hundred rebels under Tom Polk Edwards, on the day, above mentioned, came across Ashworth's

party, and took them all prisoners, includng Col. Ashworth himself. A man named -Markhain, who was an eye witness of subsequent events, says the prisoners, after their surrender, were marched into a natch of woods hard by, when just one liundred out of the hundred and twenty-five were selected, declared to be describers from the Confederate army and sentenced, part of them to be shot and part of them to be bung. Preparations were immediately made to carry the threat into execution, and two hours later the hundred poor fellows were launched into eternity, nineteen of whom were hung. The twenty-five that escaped death were released, after being compelled to witness the death of their companions, upon the promise that they would join the rebel arny. Col. Ashworth was taken away. As e was once a rebel soldier, there is no telling what unbeard of cruelties are in store for him. This Tom Polk Edwards

by a new method, and with remedies that are eminontly successful in the above class of chronic diseases.

The thinking and unbiased portion of the community will appreciate the great advantage of a permanent and reliable Institute for the cure of chronic diseases that catarri, that great promoting cause of Consumption in the Northwest, always gives way upon application of the new remedics. Dr. Halo has nover encountered a case of this disease he could not cure. The present season sase of this disease he could not cure. The present season is very favorable for applying proper remedies; delays are dangerous. Your case may be cured this mouth, not next, to-day, not to-morrow.

All who are suffering from any of the diseases Dr. Hale makes a speciality in treating, should at least call and investigate the new system for themselves. No person of good sense and sound judgment will, without full and careful investigation, denounce as "humbug" that which claims to possess merit.

7.Dr. Hale takes pleasure in referring to the following responsible parties, citizens of Janesville, who can speak knowingly as to the officacy of Dr. Hale's treatment, not to mention hundreds of others in the Northwest that have been cured:
